USAID	United States Agency for International Development

## **1. INTRODUCTION**

### **Description of the study**

This study aims to provide a clear overview of Jordanian policies to facilitate MSMEs access to finance. It is divided into two sections as follows:

#### **Section 1: Mapping of existing access to finance instruments**

An in-depth desk research has been performed to identify and select the instruments presented. For each instrument, detailed characteristics are presented and practical links are displayed for the use of MSMEs seeking more detailed and practical information.

All instruments are presented in the form of fact sheets which were designed to cover the required information to have a closer view on the situation in Jordan, the instruments fall into six (6) categories:

1. Bank loans and facilities
2. Guarantee funds and risk-sharing mechanism
3. Private equity and venture capital
4. Leasing, factoring and Islamic finance
5. Microfinance and innovative finance
6. Others (e.g. grant schemes, honour loans)

#### **Section 2: Evaluating existing access to finance instruments effectiveness**

A focus group meeting, gathering representatives of the demand and the supply side, was organized to obtain a balanced assessment of Jordan's performance in terms of Access to Finance for MSMEs and to assess the impact and effectiveness of government policies and programmes in Jordan in that respect. During the focus group meeting, participants were asked to provide views and evidence concerning the status of implementation and effectiveness of the financial instruments under review.

Participants included representatives from banks, banks association, risk sharing mechanisms, venture capital and private equity funds, as well as other non-bank instruments (e.g. MFI).

On the demand side, the focus group gathered representatives from private sector organizations, such as chambers of commerce and industry, business associations, enterprise clusters, women and youth associations; businesses, as well as entrepreneurs or direct beneficiaries of financial instruments/loans.

The participants list is annexed to this document.

#### **Definition and overview of the state of SMEs in Jordan**

The private economy in Jordan is almost entirely comprised of SMEs that represent nearly 99.6% of all firms outside the agricultural sector.

This number is based on the latest Department of Statistics Enterprise Survey and measures all firms with 99 employees or less as a percentage of the total number of firms.

In September 2005, the definition for industrial SMEs was endorsed by the Prime Ministry as a national standardized definition to be used among all relevant governmental departments, as follows:

- Small enterprises employ between 10 and 49 employees and have a registered capital of more than JOD 30,000
- Medium enterprises employ between 50 and 249 employees and have a registered capital of more than JOD 30,000

The Central Bank of Jordan also issued an SME definition on 13th January 2011 based on the following:

- For Small companies:
  - That its assets are less than JOD 1 million or that its annual sales are less than JOD 1 million
  - That it has between 5-20 employees
- For Medium companies:
  - That its assets are between JOD 1 - 3 million or that its annual sales are between JOD 1 - 3 million
  - That it has between 21-100 employees

An SME can't be a public shareholding company, or an insurance company, or a financial intermediary company.

Most Jordanian SMEs work within the formal sector and are registered, as specified by law. However, a sizeable percentage of self-employed firms are in the unregistered (informal) sector (that is, firms that deliver lawfully permitted services and products without registering with the proper authorities).

In terms of employment, formal SMEs play a significant role in employment, as they employ approximately 71.4% of the private sector's workforce and almost 49.4% of all the personnel in the country's private and public sectors.

Jordanian SMEs face several problems where access to finance is concerned; access to credit was rated as the second most significant impediment to business growth and competitiveness in Jordan, after government bureaucracy, as indicated by the Global Competitiveness Report 2011 to 2012

## Jordan Fact Sheets

### 1. Bank loans and facilities

None

## 2. Guarantee funds and risk-sharing mechanism

<b>Guarantee</b>	
<b>Programme</b>	Jordan Loan Guarantee Facility

<b>Islamic loan</b>	
<b>Programme</b>	Arab Islamic International Bank
<b>Characteristics</b>	The business centres of Islamic International Arab Bank provide a wide range of solutions and banking products compliant with Islamic Sharia' to meet the growing needs of all corporate clients, opening business centres meets the Bank objectives in supporting and developing the small enterprise sector, by addressing the growing demands of Islamic banking services.
<b>Total Amount committed</b>	N/A
<b>Application procedure</b>	To apply, businesses shall directly contact the bank (either via its website or its branches), fill an application which is the first step in the process the loan officer will follow up on the process. .
<b>Eligibility</b>	Subject to Shar'iah-compliant
<b>Terms</b>	<p><b><u>Mudarabah Financing:</u></b> Mudarabah Financing is a profit-sharing contract consisting of a capital investment from the Bank (as a Principal) and a labour investment from the client (as Mudarib). In accordance with its terms, the Bank puts forward the necessary funds to finance a specific project, whether partially or in full. The client undertakes the necessary labour so the profits are divided through agreed upon percentages. The client can only face a loss if any negligence or infractions are revealed; in the case of unsuccessful project, the client loses the labour invested, while the Bank loses its funds invested wholly or partially, as applicable.</p> <p><b><u>Istisna' Financing:</u></b> The client approaches the bank with a request for financing a specific technical/industrial project, presenting all technical designs and plans, as well as all general and specific conditions related to the project after consulting a specialized engineering consultancy firm. After the Bank approves the request, a contract is prepared detailing the project specifications, as well as the cost of the project and the payment schedule to which the client commits, whether monthly instalments or full payment. A separate contract is prepared between the bank and a "contractor", by which the contractor commits to carry out the project in accordance with the design and specifications previously outlined by the client.</p> <p><b><u>Musharakah Financing:</u></b> Musharakah is defined as a contractual agreement between the partners with regard to both capital and profit. Musharakah is one of the most important models of Islamic investment practiced by the bank.</p>

## 6. Others (e.g. grant schemes, honour loans)

<b>Grants</b>	
<b>Programme</b>	<b>Local enterprise support project ( LENS)</b>
<b>Characteristics</b>	The USAID Jordan Local Enterprise Support Project (LENS) is a five-year project (2013-2018) to encourage the long-term economic growth and development potential of underserved Jordanian communities. The project will help empower local communities to design and implement collaborative local economic

	<p>development (LED) initiatives and will support the vitality and competitiveness of micro and small enterprises (MSEs) that are often at the heart of individual, family and community livelihood within vulnerable populations.</p> <p>The USAID LENS grants fund will support qualifying initiatives in support of these objectives proposed by public and private sector institutions. The USAID LENS project is an integral component of USAID Jordan's strategy to support comprehensive development. Its focus on MSEs and LED will complement and pursue spill-over effects from other projects within USAID's portfolio in Jordan and other donor-funded projects.</p>
<b>Total Amount committed</b>	JOD 27,75 million(EUR 37million) for 5 years
<b>Application procedure</b>	To apply, businesses shall directly contact LENS website fill an application which is the first step in the process LENS will follow up on the process
<b>Eligibility</b>	<p>In order to be eligible to apply for a grant, the applicant must be:</p> <ul style="list-style-type: none"> <li>• Micro or Small Enterprise (MSE) with less than 49 employees</li> <li>• An existing business whether registered or non-registered</li> <li>• Located in one of USAID LENS project's targeted geographical areas (Irbid, Zarqa and Amman, specifically in areas outside of Greater Amman Municipality)</li> </ul>
<b>Terms</b>	<p>Funding Limit: The requested amount from USAID LENS must not exceed JOD 12 400 (EUR 16 500)</p> <p>Implementation Period: The implementation period must not exceed six (6) months</p>
<b>Contact</b>	<a href="mailto:LENSGrants@jordanlens.org">LENSGrants@jordanlens.org</a> ,

<b>Grants</b>	
<b>Programme</b>	<b>Business and Export Development Project for Jordanian Enterprises – Tatweer</b>
<b>Characteristics</b>	Tatweer is a project managed by BDC and funded by USAID. The project focuses on enhancing the competitiveness of Jordanian MSMEs and maximizing the benefits of free trade agreements. To date Tatweer has provided more than 750 financial grants in the form of: technical and marketing assistance, business plans and strategies, market analysis and assessment, product and process development, market outreach and backward linkages, export facilitation, and

	<p>capacity building of middle management.</p> <p>Financial and technical assistance was given to 300 SME's (throughout the Kingdom's governorates) out of which 75 were women-owned and managed businesses. Additionally BDC enabled Jordanian companies to access and successfully compete in international markets as well as create linkages between MSMEs and larger companies for outsourcing opportunities with the aim of increasing exports to the United States and Europe. In its sector support, BDC helped establish 8 private non-profit business associations and helped develop their organizational structure and capacity.</p>
<b>Total Amount committed</b>	JOD 14,2 million (20 million USD)
<b>Application procedure</b>	To apply, businesses shall directly contact its <b>Tatweer</b> website, fill an application which is the first step in the process <b>Tatweer</b> will follow up on the process
<b>Eligibility</b>	Financial grants in the form of: technical and marketing assistance, business plans and strategies, market analysis and assessment, product and process development, market outreach and backward linkages, export facilitation, and capacity building of middle management.
<b>Terms</b>	N/A

## **2. KEY FINDINGS OF THE FOCUS GROUP MEETINGS**

### **2.1 Introductory remarks**

Two (2) focus groups were conducted on Thursday 12<sup>th</sup> of November 2015 at Jordan Enterprise Development Corporation (JEDCO); the list of participants is set forth in Annex 1.

#### **1. Demand side focus group:**

The meeting gathered 12 representatives from Private sector including business associations, enterprise clusters, women and youth associations; Businesses, direct beneficiaries of financial instruments/loans; Academic institutions and research organizations/think tanks that are involved in access to finance issues and civil society groups such as national NGOs attended the meeting).

#### **2. Supply side group:**

The meeting gathered 15 representatives from the private sector, including Bank credit managers / officers, Jordan Bank Association; guarantee mechanisms and program; the venture capital private equity funds and other non-bank instruments (e.g. MFI).

#### **Key findings of the focus group:**

- Access to finance for MSMEs is a challenging issues; this is due to various reasons, including:
  - Shortage of reliable collaterals
  - Insufficient reliable guarantors.
  - Absence of track records for MSMEs
  - Lack of awareness of financing barriers.
  - Lack of business management and skills.
  - Non comprehensive capacity of the SME banks' credit officers
  - Credit decisions are based on collaterals/guarantees rather than to be based on the cash flow analysis of the projects
  - High interest rate impeding MSMEs business feasibility.
  - No proper communication with lenders.
  - Lender's risk management and concern of loan default (risk averse policies)
  - Lender's high requirements of financing
- The financing gap between supply and demand was also recognized as a key concern.
- The communication gap between the supply and the demand was identified as a weakness.
- Capacity of the supply side is low and constrains the amount of finance extended to MSMEs (i.e. increasing the percentage of MSEM's lending out of the total bank's portfolio); in specific issues such as: MSMEs credit and financial analysis and project evaluation in certain sectors such as energy and environment.,
- Need to raise the awareness of the demand side of the available Access to Finance instruments.
- The disbursement of Central Bank programs and projects directed for MSMEs financing through banks should be monitored

## 2.2 SWOT Analyses

This section presents the SWOT analysis by type of instruments as well as for the supply and demand sides in general.

### A. Instruments

#### 1. Bank loans credits and financing facilities

<p><b>Strengths</b></p> <ul style="list-style-type: none"> <li>• Commercial banks have produced and identified systematic products and banking solution for MSMEs and established SMEs windows</li> <li>• Trained employees to raise their capacity for MSMEs lending</li> <li>• MSMEs sector is taken into consideration in short, medium and long run strategic plans.</li> </ul>	<p><b>Weaknesses</b></p> <ul style="list-style-type: none"> <li>• Interest rates and the cost of lending are often very high, not affordable by MSMEs</li> <li>• Repayment periods are relatively short, generally 4-5 years which is very tight for a newly established company</li> <li>• Grace periods on loans are short, if any (generally do not exceed 9 months), which is barely enough to start operations for newly established companies and to generate positive cash-flow</li> <li>• The unavailability of instruments needed to manage risk.</li> <li>• Excessive Paperwork Requirements</li> <li>• Decisions are being taken based on collaterals and guarantees</li> </ul>
<p><b>Opportunities</b></p> <ul style="list-style-type: none"> <li>• Relatively large number of private commercial banks (25) operating in Jordan</li> <li>• Financial inclusion strategy adopted with Central Bank and other stakeholders.</li> <li>• Availability of excess liquidity at banks</li> <li>• Guarantee programs are being introduced and linked directly with banks</li> <li>• The establishment of the Credit Bureau, increased transparency in banking system</li> </ul>	<p><b>Threats</b></p> <ul style="list-style-type: none"> <li>• MSMEs in Jordan receive only 10% of the overall credit facilities extended by commercial banks</li> <li>• There is communication gap between MSMEs and the banks</li> <li>• Banks do not rely on business plans when evaluating a loan, and often do not have the needed expertise to evaluate a new or innovative idea</li> <li>• Non-uniform credit scoring systems</li> </ul>

## 2. Guarantees and risk-sharing mechanisms

<p><b>Strengths</b></p> <ul style="list-style-type: none"> <li>• Accredited guarantee programs/companies working based on the international best practices</li> <li>• Collaboration with banks on providing training programs for bank credit officers to raise their awareness on decision making (cash flow vs. collateral and guarantee)-</li> <li>• Well established relationships with banks</li> <li>• Availability of funds for the guarantee programs/companies</li> <li>• Innovative guarantee tools dedicated and directly linked with the needs of MSMEs</li> </ul>	<p><b>Weaknesses</b></p> <ul style="list-style-type: none"> <li>• Communication gap between guarantee programs and banks</li> <li>• Only 2 programs (JGLF) (JLGC) are operating in Jordan</li> <li>• Products needs improvement</li> <li>• Low leverage multiplier</li> </ul>
<p><b>Opportunities</b></p> <ul style="list-style-type: none"> <li>• Increased donors interest (availability of funds for guarantees)</li> <li>• Introduction of guarantee tools for Islamic finance.</li> </ul>	<p><b>Threats</b></p> <ul style="list-style-type: none"> <li>• Low level of market competition</li> <li>• Medium term project for the JLGF</li> </ul>

## 3. Equity and venture capital

<p><b>Strengths</b></p> <ul style="list-style-type: none"> <li>• There is potential for investments and growth, should the necessary capital be provided (quality deal sourcing).</li> <li>• Catalyse entrepreneurial ecosystem</li> <li>• Experienced teams in managing fund</li> </ul>	<p><b>Weaknesses</b></p> <ul style="list-style-type: none"> <li>• Not regulated market</li> <li>• Equity financing is mainly limited to ICT companies</li> </ul>
<p><b>Opportunities</b></p> <ul style="list-style-type: none"> <li>• Promotes profit-and-loss sharing between financiers and entrepreneurs</li> <li>• Increased risk sharing and fostering entrepreneurship especially of seed and early-stage start-ups</li> <li>• Upcoming start-up funds (between central bank, banks, and international donors).</li> <li>• Venture capital law is currently being drafted that shall regulate the market and provide incentives to have an industry regulated in accordance with the international best practices, accordingly international funds to register in Jordan</li> <li>• The introduction of Crowdfunding</li> </ul>	<p><b>Threats</b></p> <ul style="list-style-type: none"> <li>• Difficulty in forming connections with other Angel Investors</li> <li>• Lack of exit strategies</li> <li>• Not enough amount of seed and venture capital funding available to promising start-ups and early-stage growth and innovative enterprises</li> <li>• Reluctance for accepting equity financing, as high percentage of SMEs are family owned businesses and/or unawareness of the importance of equity financing</li> </ul>

#### 4. Leasing, factoring and Islamic finance

<p><b>Strengths</b></p> <ul style="list-style-type: none"> <li>• Use of movable collaterals</li> <li>• Fixed financing rate during financing term</li> <li>• Ideally overcomes collateral requirements through enforcing sale of asset in the case of default</li> <li>• Simple documentation and processes</li> </ul>	<p><b>Weaknesses</b></p> <ul style="list-style-type: none"> <li>• Still relatively small in terms of size compared to conventional finance,</li> <li>• Limited to meet demand of Islamic oriented MSMEs</li> </ul>
<p><b>Opportunities</b></p> <ul style="list-style-type: none"> <li>• Growth rate is increasing</li> <li>• Increased demand especially in rural areas</li> <li>• A study has been undertaken to introduce factoring industry in Jordan</li> </ul>	<p><b>Threats</b></p> <ul style="list-style-type: none"> <li>• Lack of factoring instruments</li> <li>• not enough specialized human resources</li> </ul>

#### 5. Micro-finance and innovative finance

<p><b>Strengths</b></p> <ul style="list-style-type: none"> <li>• Increased ability to service rural areas, through the branches and mobile financing</li> <li>• MFIs are currently being regulated by CBJ</li> <li>• Innovative financing tools</li> <li>• DEF has signed an agreement with JLGC</li> </ul>	<p><b>Weaknesses</b></p> <ul style="list-style-type: none"> <li>• Supply of credit not meeting demand</li> <li>• Excessive Paperwork Requirements</li> <li>• Credit decisions are based on collaterals and guarantees</li> </ul>
<p><b>Opportunities</b></p> <ul style="list-style-type: none"> <li>• Large number of points of service</li> <li>• Increased interest of donors</li> <li>• Increased amounts of funds available to MFIs, through Central Bank of Jordan (CBJ) credit lines, after being regulated by CBJ</li> <li>• Reduction in interest rates imposed by MFIs after being regulated by CBJ</li> </ul>	<p><b>Threats</b></p> <ul style="list-style-type: none"> <li>• Funding challenge</li> <li>• High operating costs, that limits the reduction in interest rates</li> </ul>

## **B. Supply & Demand**

### 1. Demand Side

<b>Strengths</b> <ul style="list-style-type: none"><li>• The most significant drivers of economic growth( 98% of total number of register companies in Jordan)</li><li>• Contribution to Jordan economic development</li><li>• Quality of ideas</li><li>• Motivated entrepreneurs with innovative and new ideas</li></ul>	<b>Weaknesses</b> <ul style="list-style-type: none"><li>• Lack of credit histories and collateral</li><li>• Lack of entrepreneurship skills</li><li>• Not unified definition of MSMEs</li><li>• Limited managerial and technical skills</li></ul>
<b>Opportunities</b> <ul style="list-style-type: none"><li>• High growth rate</li><li>• Increase Government and donor interest</li><li>• The introduction and availability of different mentoring programs that provide managerial and technical skills to increase the capacity of the project owners</li><li>• The introduction of entrepreneurial skills at elementary schools and university education</li></ul>	<b>Threats</b> <ul style="list-style-type: none"><li>• Deficient of one stop shop service</li><li>• The governmental and regulatory approvals harms the development and establishment of projects</li><li>• High investment costs</li><li>• The unavailability of funding</li><li>• The unavailability of infrastructure at the governorates might hinder the development of projects, increase establishment costs, and increase costs</li></ul>

### 2. Supply Side

<b>Strength</b> <ul style="list-style-type: none"><li>• Liquid banking system, excess liquidity at banks</li><li>• The availability of international funds directed to SMEs</li><li>• Innovative financing tools</li><li>• Strong banking system</li><li>• Large number of point of services ( 700 banks branches)</li></ul>	<b>Weaknesses</b> <ul style="list-style-type: none"><li>• Eligibility criteria</li><li>• Complicated Application forms</li><li>• Unskilled labour</li><li>• Risk averse managerial decisions</li><li>• Credit decisions are based on the availability of collaterals and guarantees</li><li>• The unavailability of the early stage funding (between seed finance and capital for growth funds)</li></ul>
--	---

Opportunities	Threats
<ul style="list-style-type: none"> <li>• High donor interest</li> <li>• Incentives are being introduced by CBJ to motivate SME lending</li> <li>• Changing mind set of the banking sector to have the lending decision based on future cash flows rather than on the availability of collaterals and guarantees</li> <li>• Activating the Credit Bureau will lead to more transparent banking system</li> </ul>	<ul style="list-style-type: none"> <li>• Lack of Legal Supervisory Consistency there is currently no Eligibility under the Jordanian law that limits the types of institutions that can engage in microfinance lending.</li> <li>• Lack of data and information sharing</li> <li>• Insufficient risk sharing mechanisms</li> <li>• No credit scoring system</li> </ul>

## 2.3 Identified good practices

The participants to the focus groups identified the following programmes / instruments as good practices:

### CBJ /World Bank programs

The World Bank extend a low interest, long-term EUR 66 million loan to Jordan in order to facilitate the financing of micro projects and small and medium enterprises (SMEs).

The loan administered by the Central Bank of Jordan (CBJ) as it on-lends funds to local banks, who will then allocate funding to micro projects and SMEs. The SMEs will pay 5% interest rate.

### CBJ /Arab fund program

The CBJ signed a EUR 95 million loan agreement with the Arab Fund for Economic and Social Development to extend credit to SMEs via local banks, The total volume of credit available to SMEs at very low interest; the SMEs will pay 5% interest rate for the bank loans.

## 3. POLICY RECOMMENDATIONS

Based on the analysis of the instruments, SWOT and the good practices, the following policy recommendations could be drawn:

### *On the supply side:*

- Activating range of Incentives to encourage supply to direct more loan funds to MSMEs such as taxes exemptions
- Strengthening risk sharing mechanisms to encourage supply to invest more capital for MSMEs financing.
- By developing an enabling environment for asset-based and equity-based finance, markets could attract excess liquidity available in Islamic financial markets especially in the Middle East seeking attractive investment opportunities.
- Creating a unified data centre of available sources of finance and grants to financial institutions.
- Building the capacity of the financing sector: by providing the credit officers trainings on financial and credit analysis for SMEs, and to change the mind-set of the managerial level staff to have lending decisions based on the projects' cash flows rather than the availability of collaterals and guarantees.

***For the demand side:***

- Creating a business directory targeting the demand side that includes all the information about the available access to finance instruments (including costs, repayments and type of financing).
- Building the Capacity of MSMEs: it is important that the government provides capacity-building for MSMEs to improve their skills and capabilities. This could be done at two different levels by:
  - Providing mentoring and training programs on technical, managerial and financial skills; and
  - Enhancing their creditworthiness through the introduction of credit guarantee schemes, state banks and funds, and supply chain finance linked to public procurement and payments.
- Enabling environment for MSMEs finance: this includes providing the legal and regulatory framework in support of MSME access to finance. The government of Jordan already reduced reserve requirements to lower interest rates for MSMEs, but it could design more tools to make finance more affordable to MSMEs.

#### **4. CONCLUSION**

MSMEs Access to finance in Jordan needs to be improved thanks to joint efforts of the government, the private sector and the international donor community. This cooperation is important for reducing the financing and communication gaps between supply and demand. This could be accordingly various interventions on different level of effort should be implemented. This could be translated into the following action:

***In the short term:***

- Building the capacity of the supply side on SME lending techniques and opportunities;
- Strengthening risk sharing mechanisms;
- Attracting more donors' funding.

***In the medium term:***

- Improving the regulatory and incentives provided for MSMEs
- Reinforcing the guarantees and venture capital facilities
- Reducing the information gap faced by MSMEs in accessing finance and
- Facilitating their access to capital markets.

***In the long term:***

- Establishing the legal framework including the appropriate legal and tax treatments in accordance with international best practices.
